

Delphi Develops Corporate Environmental Strategy for Toronto Hydro

CHALLENGE

Toronto Hydro wanted to develop a corporate environmental strategy to improve environmental performance, reduce its carbon footprint and meet climate change targets set by the City of Toronto and its board of directors and senior executives.

SOLUTION

Delphi's team worked with Toronto Hydro to develop its corporate environmental strategy, which included a suite of nine ranked options for reducing GHG emissions.

VALUE

Delphi's work has meant that Toronto Hydro will be able to meet climate change targets set by the City of Toronto and required by its board of directors. Delphi's work has meant that Toronto Hydro can maintain its environmental leadership, reduce risk, improve performance and strengthen long-term value.

TODAY'S REALITY

As large final emitters, utilities face significant pressure to reduce their carbon footprints and improve overall environmental performance. Regulators, shareholders and stakeholders are all demanding that the utility sector adopt strategic and sustained responses to climate change, risk management and long-term performance.

THE CHALLENGE

Toronto Hydro needed to develop a corporate environmental strategy that would reduce its environmental footprint and meet demands from its board, executives, and external stakeholders and would enable compliance with proposed municipal, provincial and federal climate change targets.

"The Delphi Group has been a valued partner to Toronto Hydro in the development of our Corporate Environmental strategy. They have helped us reach critical milestones on both strategy and technical matters related to our goals."

Blair Peberdy, VP Marketing, Communication and Publics Affairs, Toronto Hydro

HOW DELPHI DELIVERED

Delphi worked with Toronto Hydro to develop a corporate strategy to improve overall performance and minimize their environmental footprint. Delphi's experience with sustainability planning and our knowledge of municipal, provincial and federal regulatory policies helped us develop a framework for technology decisions, performance improvement and overall strategy design.

VALUE ADDED

Delphi's work with Toronto Hydro ensured they could meet climate change targets set by the City of Toronto and expectations of their board and executives. The strategy also ensured ongoing compliance in the face of regulatory uncertainty at the provincial and federal levels. Delphi's work has meant that Toronto Hydro can maintain its environmental leadership, reduce risk, improve performance and strengthen long-term value.
